PROFILE

Frontend Developer passionate about code and design. I use code to learn, experiment, and grow — every project is an experiment exploring a new tool, idea, or way of thinking. I love building clean, well-structured UIs with React & Next.js and creating immersive experiences with GSAP and Three.js.

SKILLS

Frontend
React, Next.js, TypeScript, JavaScript, HTML5, CSS, Tailwind CSS

Animation
GSAP, Three.js

Backend
Node.js, Superbase, MongoDB

Tools
Git, GitHub, Figma, VS Code

EDUCATION

Culture & Science City, 6th of October 2025 – Now

PROJECTS

Fasylish — Full E-Commerce Platform *React · TypeScript · Tailwind · Superbase*

- Built a complete shopping experience: auth, product filtering, cart, wishlist, and a VIP membership system with tiered perks.
- Developed a **custom design builder** allowing users to pick colors and styles before purchase, connected to a live Superbase backend.
- Implemented full **bilingual Arabic/English support with RTL layout**, handling all edge cases for direction switching.

Solar System — Interactive 3D Experience *Three.js · Next.js · GSAP*

- Built a fully interactive 3D solar system with **realistic planet orbits** and accurate speed ratios using Three.js.
- Implemented free **camera orbit controls** with smooth zoom and pan, letting users explore the scene from any angle.
- Used GSAP to animate UI panels and planet info cards with smooth entrance and exit transitions.

Headphones Store — Animation-Driven Showcase *Next.js · Tailwind · GSAP*

- Designed and built an immersive product showcase where **every scroll triggers a GSAP timeline sequence**.
- Implemented a **dynamic color theme switcher** that shifts the entire page palette per product variant in real time.
- All transitions run at 60 FPS with zero layout shift — focused entirely on animation performance.
